8 Een Sheet List plotten naar één Multi-sheet PDF bestand 12

# Page Setup

#### **1** De Stufit Page Setup importeren

Een AutoCAD tekening kan pas worden ge-plot wanneer alle benodigde plotinstellingen zijn opgegeven. Deze instellingen worden in een AutoCAD tekening opgeslagen als een z.g.n. **Page Setup**.

leder tab-blad in een AutoCAD tekening heeft een 'eigen' Page Setup, maar er kunnen ook extra plot-instellingen als z.g.n. **Page Setup Overrides** in een tekening zijn opgeslagen. Een inspectietekening heeft standaard zo'n Page Setup Override met de naam **Stufit**, die tevens standaard is toegekend aan het 'Model' tab-blad.

## **Publish**

#### Het snelmenu van het publish commando

AutoCAD heeft een **Publish** commando waarmee één of meerdere tekeningen snel naar de standaardprinter of een PDF bestand kunnen worden ge-plot. Tevens kan dit commando **Sheet Lists** met tekeningen opslaan om deze vervolgens op een later tijdstip opnieuw in te lezen, waarna nieuwe afdrukken of PDF bestanden van gewijzigde inspectietekeningen direct kunnen worden ge-plot.

#### **2** Plotten van één tekening naar de standaardprinter

<ul> <li>Open de uitklaplijst en kies 'Plotter named in page setup'</li> </ul>	<b>S</b> -	Publish      Publish Detions Information     Location: .\      Publish to:      Plotter named in page setup     Automatically load all open drawings      Automatically load all open drawings
<ul> <li>Kies de tekening en selecteer de Stufit Page Setup</li> </ul>	<b>G</b> -	Publish Qptions       Sheet Name       3D DWF       ************************************
		Publish Output
<ul> <li>Controleer</li> <li>'Number of</li> <li>conies' en kies</li> </ul>	<b>K</b> a	Preview
[Publish]	-	- ngle Decails Publish CancelElp

Let op! In de Stufit Page Setup is als printer configuratie voor **Default Window System Printer.pc3** gekozen. Via het Start-menu van Windows 7 kan via **Apparaten en printers** een printer als standaardprinter worden ingesteld.

### **B** Plotten van één tekening naar een Single-sheet PDF

Wanneer de PDF optie Single-sheet file Is gekozen zal AutoCAD altijd bestaande PDF bestanden zonder te vragen overschrijven!

De locatie .\ verwijst naar de folder van waaruit AutoCAD is gestart. Bijvoorbeeld via een 'dubbel-klik' op een DWG bestand. Alléén wanneer AutoCAD wordt opgestart in de juiste projectfolder is het niet nodig om een locatie voor de PDF bestanden te kiezen. Controleer dus altijd of de opgegeven 'Default output location' goed is!

 Open met de rechter muisknop het snelmenu en kies de optie 'Rename Sheet' en verwijder de tekst '-Model'

• Kies [Publish]
